Subject: C & P Bond - Surety Bond 64S104243678BCM (Emery Mine)

Kevin - Thank for you for calling me about the C & P bond posted by Travelers and our discussion of its status. Your fax said that the "copy" bond that we received was meant to be a "sample" bond and has since been destroyed.

For the record, I was never made aware that it was a "sample" bond and had tried to contact Dan Baker, President of C & P Coal Corporation a number of times about the status of the bond I had received. As far as I knew, there was an original bond in existence that needed to be released.

In light of this new information, the Division does not consider this an authentic document and this bond is no longer an issue.

I appreciate your assistance. Thank you. Pam
